

Anti-Spam Policy

Effective date: Aug 20, 2026

1. Purpose and scope

Parta IO Corp. ("Parta", "we") prohibits advertising or promoting parta.io, its subdomains or the Parta platform through unsolicited messages (spam).

This policy applies to:

- Parta, its employees and contractors;
- affiliates, resellers, referral and marketing partners, and any third party promoting Parta.

2. Definitions

Unsolicited message – any commercial or promotional message sent to a recipient who has not given prior consent to receive it and has no existing business relationship with the sender that permits it under applicable law.

Spam – unsolicited messages sent in bulk or individually, by any channel, including:

- email;
- SMS, messaging apps and push notifications;
- social media direct messages, comments and posts;
- forum, blog and review-site posts;
- instant messaging, chat and community platforms (Slack, Discord, Telegram, WhatsApp);
- automated calls and voicemail.

3. Prohibited practices

No person may promote parta.io or the Parta platform by:

1. Sending commercial messages without the recipient's prior consent where consent is required by law.
2. Using purchased, rented, scraped or harvested contact lists.
3. Using false or misleading sender information, subject lines or headers.
4. Concealing the commercial nature of a message or the identity of the sender.
5. Sending messages without a working opt-out, or continuing after an opt-out request.
6. Using open relays, compromised accounts, botnets or other unauthorised infrastructure.

7. Posting promotional links to parta.io in forums, comments or communities where such posts are not permitted.

4. Parta's own communications

Parta sends marketing messages only to recipients who have opted in or where another lawful basis applies. Every marketing message we send:

- identifies Parta as the sender and includes our postal address;
- has an accurate subject line;
- contains a one-click unsubscribe link; opt-outs are processed within 10 business days;
- complies with the US CAN-SPAM Act and other applicable US federal and state laws.

Transactional and service messages (account, billing, security) are not marketing and are sent as needed to provide the service.

5. Partners, affiliates and third parties

Anyone promoting Parta on our behalf or for a commission must comply with this policy and all applicable anti-spam laws. Parta does not authorise, request or reward promotion through unsolicited messages. Commissions or fees earned through spam are forfeited.

6. Reporting spam

If you receive an unsolicited message promoting parta.io, forward it with full headers to support@parta.io. We investigate every report and respond within 5 business days.

7. Enforcement

Violations may result in:

- immediate suspension or termination of the account, partnership or affiliate agreement;
- forfeiture of unpaid commissions or fees;
- reporting to the relevant authorities, internet service providers and blocklist operators;
- legal action to recover damages.

8. Changes and contact

We may update this policy at any time; the current version is published at parta.io with its effective date. Questions: support@parta.io.
